

Go-To Tool for Faster Results

How Magnet AXIOM Provides the Data Clients Need to Make Decisions

THE CHALLENGE

DriveSavers forensic examiners need to be able to retrieve email, Google Suite and Office 365 documents, and messages from a wide range of cloud services and encrypted devices, including smartphones. As a result, the ability to use cloud credentials to retrieve data and backups is very important.

In addition, because processing and searching are often the most time-consuming aspects of a digital investigation, examiners need to be able to preview media before committing to analyze it. Savings in time and effort can also be important when it comes to communicating with non-technical stakeholders.

COMPANY OVERVIEW

DriveSavers Data Recovery, Inc., based in Novato, California, USA, has built a reputation around its ability to recover data from the oldest and most damaged or otherwise corrupted digital media. This deep experience enables DriveSavers to offer digital forensics services in a wide range of cases from theft of intellectual property and trade secrets, to fraud, to employee misconduct including harassment and misuse of corporate assets.

“ I use AXIOM as my go-to tool for fast results in order to get ‘low hanging fruit’ to my clients as soon as possible so they can make quick sound decisions in a timely manner. [AXIOM is] fast and easy, very intuitive.

— John Ahearne, Digital Forensic Examiner, DriveSavers Data Recovery, Inc., California, USA

HOW AXIOM HELPS

AXIOM enables forensic examiners to find important evidence faster by easily recovering unknown artifacts, or those that are typically difficult to find, from otherwise unsupported apps. In addition, flexible export and reporting options help to present clear, concise case findings to HR, legal, and other stakeholder teams.

In one example, multiple employees were thought to have started a business in direct competition with their current employer. Examiners needed evidence quickly to determine whether to initiate an employee misconduct case. AXIOM was able to parse an iPhone backup that provided that early evidence and gave examiners enough to keep digging. Ultimately, not only did DriveSavers build a strong case; they also managed to procure additional work based on their efficiency and results.

EVIDENCE SOURCES

CLOUD PLATFORM AUTHENTICATION

I have proper search authorization to access the target's information stored in the cloud.

Warrant number

To obtain evidence from a cloud-based social media platform, you must sign in with the target's user name and password.

PLATFORM	SIGN-IN STATUS	USER ACCOUNT	LAST ACTIVITY (UTC)	ACCOUNT SIZE
 Apple	SIGNED IN	John.Doe@icloud.com	8/23/2018 2:39:25 PM	4688.59MB
