

# MAGNET ATLAS™

How Magnet ATLAS Can Help

## MANAGE AND ASSIGN CASES

- Lab managers are immediately notified when a web form is submitted and can assign the appropriate resource to the case.
- All evidence, procedures, investigators, examiners, results and tools are documented and stakeholders receive progress updates along the way.

## GENERATE CASE STATISTICS

ATLAS can report on the following and more:

- The number of evidence sources reviewed per case/month/year.
- The examiner-hours spent on each evidence item or case.
- The number of cases assigned to each investigator
- The forensic tools and hardware used on each investigation.

I can now look for exact statistics and run reports in minutes, if not seconds. One report has all the information I need to submit.”

Linda Jackson

IMPD Unit Supervisor, Indianapolis Metropolitan Police Department

## MAINTAIN THE CHAIN OF CUSTODY

- With ATLAS, you can track all evidence sources, examinations, and individuals who came in contact with evidence—ensuring that the full case history is preserved.
- Quickly produce reports on your investigations to ensure that appropriate procedures were followed.

# MAGNET ATLAS™

## Easily track and report on digital forensics investigations while maintaining the chain of custody

### THE CHALLENGE

Digital forensics labs are making do with band-aid solutions for workflow and case management cobbling together spreadsheets, different databases, Word docs, and tools that aren't made for forensics investigations. You need an easy-to-use solution that organizes cases and keeps the chain of custody without the need for excessive training.

### OUR SOLUTION

Maintain the Chain Of Custody:

- Document all evidence sources, examinations and individuals involved in the investigation.
- Easily review past investigations to ensure that appropriate procedures were followed.

Manage Investigations:

- Quickly assign cases to the appropriate examiner.
- Notify stakeholders with case updates when investigative milestones are reached.
- Easily submit cases to the digital forensics lab via a web form.

Evidence, Case & Expense Reporting:

- ATLAS makes it easy to generate both the real-time and historical statistics you need to build reports for your stakeholders.
- Since ATLAS keeps a holistic record of digital forensic examinations, it's easy to review prior cases and quickly pinpoint areas of interest.

Enhance Collaboration:

- ATLAS makes it easy for any team member to kick-off and contribute to a digital forensic investigation, ensuring that everyone stays in-the-loop—no matter where they're located.

Data Security:

- With role-based permissions, password protection, AES 256-bit encryption for data at rest, and TLS/SSL encryption for data in transit, you can be assured that your agency's data is protected.

Easy to Use:

- Gone are the confusing and cluttered screens that pass for case management. No matter your skill level, ATLAS' elegant user-interface makes it easy for any user to track the progress and review the findings of both current and past investigations.

Integrate with ATLAS API:

- With the ATLAS API, integrate and connect with other tools in your existing ecosystem to trigger key tasks in ATLAS such as creating a new case, adding evidence to a case, pulling aggregated statistics, and more
